

Grey breasted conure

Pyrrhura giseipectus

- + This endangered bird is only known to inhabit two locations in north east Brazil, where it lives
- + Extensive clearing of their habitat to turn into coffee plantations is to blame for their decline in numbers
- + Buying rainforest alliance certified coffee helps prevent more habitat loss for these birds.

Size (cm):	22
Weight (g)	50
Intelligence:	30
Lifespan (years):	30
Risk of Extinction:	5 (CR)
Bird Wow Factor:	160

African speckled pigeon

Columba guinea

- + This bird is similar to our native rock dove in size, behaviour and appearance and is found all across Africa
- + These birds make very basic twig nests, on a ledge, shrub or platform
- + They have white speckles on their wings, giving the species its 'speckled' name

Pekin robin

Leiothrix lutea

- + This bird, also known as the red-billed leiothrix, is native to eastern Asia
- + Although not currently considered a threatened species, their numbers are declining due to the pet trade and deforestation
- + They live in large flocks of up to 30 birds in the forest, and are very friendly and sociable birds

Blue and gold macaw

Ara Ararauna

- + These birds are one of the most recognisable parrots in the world and are very good at imitating human speech
- + They are very clever birds and are thought to have similar intelligence levels to a human toddler
- + Their large beaks are ideal for cracking nuts and hard seed pods
